History

Since 1988 we have been supplying quality mulch to our friends & neighbors here in North Central Indiana and beyond. We believe we are the premier producer of premium landscape mulch and animal bedding from superior color to unmatched quality & consistency.

Earth Friendly

We are committed to the safety of everyone's family and their pets.

Every colorant or dye has been tested and proven safe for people, pets and our environment. Independent laboratory study results placed our colorant in the lowest level of toxicity category IV. The same as everyday table sugar. By contrast salt and baking soda are more toxic.
